

Podcast: Voting Machine Fail

15 June 2020

We wind the clock back to November 2019 and investigate the failure of voting machines in Northampton County, Pa., USA. We break down what went wrong, what caused the problem and what we can learn about the risks of software development from this high profile incident.

The show notes and transcripts are available for free (<https://investigatingsoftware.podbean.com/e/voting-machine-fail/>).
